Finance for Non-Finance Managers

2 day   Live Online, Face-to-Face, Workplace $ 1660

In most roles, there comes a time when you need to understand "the numbers" or the financial implications of actions in the workplace.

This two-day course gives professionals the skills to understand business financials and shows them how to confidently hold financial discussions with the leadership team.

Participants will be able to make rapid and accurate decisions based on financial data, and understand the impact of these decisions. This course is not for accountants! It is a core skill that all managers and leaders should have, to be able to confidently sit in meetings where complex accounting and financial discussions are held.

You will learn the fundamentals of finance, including how to decipher accounting terminology and industry jargon, be able to undertake top-line interpretation of reports and business cases, and make decisions based on presented financials.

This course doesn't require, or focus on, mathematics skills. Rather, it focuses on terminology, report interpretation, and how to unpack and understand what is represented in complex financial models and reports.

You'll gain a fundamental understanding of the impact of actions and behaviours on the business financials. .
